CERTIFICATE IN TREASURY

A guide to organising your learning time

CERTIFICATE IN TREASURY

Choosing to do the Certificate in Treasury (CertT) puts you on the path to becoming a trusted professional, relied upon for your operational competencies and technical know-how. You'll be in a position to add value to the business or your clients by offering practical guidance to colleagues, while driving continuous improvements.

The progressive nature of ACT qualifications means that the CertT builds on what is learnt on the Certificate in Treasury Fundamentals (CertTF) and delivers practical understanding of the context of treasury within the organisation, cash, liquidity and risk management, how to source finance, systems needed and the impact of regulations.

Getting qualified also allows you to use the globally recognised designatory letters, CertT after your name - the clear indicator to colleagues, clients, recruiters and employers that you are a credible, trusted professional.

To get you assessment ready, learning is offered through the ACT Learning Academy, the official study centre of the Association of Corporate Treasurers (ACT).

To give you the very best chance of assessment success you get:

- **Flexibility and choice** - study on the go, in the office or at home
- **Professional expertise** - our tutors and trainers are industry experts
- **Personal support** - our friendly programme managers are here to help
- **Excellent resources** - practice exams, study guides, study tips and techniques
- **Outstanding pass rates** - learning materials designed to get you assessment ready

HOW TO GET STARTED

When you submit your booking for the online course, it will be processed within five working days and you will receive access to the academy on the day your booking is processed. From here, you access your online course materials and once you are logged in you can start studying straight away. All study guides are available to download as well if you prefer to study off line at any time.

The key to success is to choose an assessment window and work backwards from that date to plan your learning time. As a guide, you can use any of the suggested learning time management plans or make one that works for you.

Everyone learns at their own pace, which is why with the ACT Learning Academy you have 24/7 access to your learning materials online and they are available for download so that you can access them offline too. Sometimes work commitments take precedence, or you need to pause and take a break around a life event, but remember your professional development is important too. You have access to your learning materials for 24 months so if you want to spread your learning out over a longer period of time, you can do that, but for best results, we recommend keeping up the momentum!
